

## COVID 19 Safety Measures

At Donna Sarna Physiotherapy the health and safety of our clients and our staff is of the utmost importance. In returning to practice with the coronavirus still at risk we are following the guidelines of the Canadian Physiotherapy Association, Health Canada and the Government of Manitoba. We have implemented enhanced measures to our clinic to ensure your health, safety and comfort.

All clients are requested to complete the COVID-19 screening questionnaire prior to attending your appointment.

Upon entry to the clinic all clients are requested to hand sanitize. Sanitizer is available throughout the clinic, including in all treatment rooms. Clients are also required to hand sanitize prior to leaving their treatment rooms.

Upon entry to the clinic all clients are provided a surgical mask. All staff will be wearing surgical masks, and the Physiotherapists will also wear eye shields.

Social distancing guidelines are in effect throughout the clinic, including a plexiglass barrier at the reception desk, as well as markers on the floor designating safe standing/sitting areas. Clients are directed immediately into their private treatment room to wait for their appointment.

All treatment rooms, surfaces, equipment and doorknobs are cleaned with a Health Canada approved disinfectant between each patient. All high touch surface areas throughout the clinic, including the bathrooms, will be cleaned multiple times throughout the day.

Safety and health will continue to be our top priority through these challenging times. If you have any questions or concerns, please feel free to contact us at the office at 204-452-2608 or email us at [info@dsphysio.com](mailto:info@dsphysio.com).
